

CLIENT MEMO

Date: November 10, 2016

Dear Valued Clients,

Effective December 12, 2016, in a continuing effort to optimize our offerings, these changes will be made.

- The turnaround time (TAT) for the following test code will be changed to 10 weeks.
 - Hypoglycemia Panel by Massively Parallel Sequencing (TC 21000)

- The following test codes will be discontinued:
 - GJB6 Gene Sequencing by Massively Parallel Sequencing (TC 29360)
 - GJB6 Sequence Analysis – Known Familial Mutation (TC 29361)
 - MEFV Prenatal Sequence Analysis (GeneAware) (TC 60492)

Please note that targeted analysis for the 232kb and 309kb deletion mutations in the GJB6 gene is still available at Baylor Genetics under test code 6355.

Please direct any questions to 1-800-411-GENE or email us at geneticstest@bmgl.com. Please visit our website at www.BMGL.com for additional information on our test offerings.

Sincerely,

Alan Pourpak, PhD, MBA
Director, Product Development and Strategy
