BAYLOR MIRACA GENETICS LABORATORIES HAS A MULTITUDE OF RESOURCES THAT ARE AT YOUR FINGERTIPS!

Genetic Counselors — Our team of certified genetic counselors is on hand to help with any questions you may have about **GeneAware**. Our counselors are happy to work with you to make the best decisions for your patient, including choosing the most appropriate panel for your patient and interpreting the results.

Billing — Our dedicated billing team is available to answer your questions about test prices, insurance coverage, and payment options. They are also experienced in handling both the preauthorization and peer-to-peer processes.

Client Services — Our knowledgeable client services team is available Monday-Friday from 8am to 6pm, Central Time, to address any other questions or concerns you may have.

Sample Receiving — Our trained sample receiving staff is ready to receive samples Monday-Saturday.

REPRODUCTIVE CARRIER SCREEN

geneaware

Providers

WHAT IS GENEAWARE?

GeneAware is a reproductive carrier screen that detects disease-causing variants in over 150 genes by full gene sequencing supplemented with copy number analysis for genes with frequent deletions. This includes serious disorders such as Duchenne muscular dystrophy, alpha thalassemia, and MECP2 duplication syndrome, which are not routinely included in other carrier testing panels. **GeneAware** is intended to be used as a family planning tool, allowing patients to be tested individually or with their reproductive partner for their risk of having children with various genetic conditions.

There are four different **GeneAware** panels that allow you to order the best test for your patients. Females are screened for X-linked Duchenne and Becker muscular dystrophies and Fragile-X syndrome in all four panel options.

Complete – over 150 disorders included for the most comprehensive screening

ACMG and ACOG – disorders recommended for screening by ACMG and ACOG

Ashkenazi Jewish – over 35 disorders specific for individuals of Ashkenazi Jewish descent

Basic – several of the most commonly requested disorders

For a complete list of genes and disorders on each panel, please visit our website: www.GeneAware.clinical.bcm.edu.

HOW TO ORDER

GeneAware can be ordered on-line through our provider portal. You can sign in with your **GeneResults** account, if you have one, or you can set up an account the first time you visit our website. Using our portal you can enter patient information, manage and track your orders, and view patient reports.

Results will be available within two weeks after a patient's sample is received in our lab. You will have access to the report through our **GeneResults** portal. Collection kits may also be ordered through the provider portal at no charge.

LET BAYLOR MIRACA GENETICS LABORATORIES (BMGL) HELP YOU EVERY STEP OF THE WAY

After results are received, you may discover that further genetic testing is warranted. BMGL can perform full gene sequencing and targeted mutation testing for all genes covered in **GeneAware**. Depending on results, a patient's partner and/or family members may be interested in follow up testing.

A patient's results may also indicate that they might want to consider prenatal testing in the event of a pregnancy. We offer prenatal testing for all genes in our **GeneAware** panels. BMGL also offers a range of more general prenatal tests to meet all of your needs, such as chromosomal analysis, including microarrays.
