

## Is PreSeek™ an Appropriate Screen for your Patient?

<sup>1</sup> The clinician should contact Baylor Genetics if another relative does have a molecular diagnosis of a condition on **PreSeek**.

<sup>2</sup> **PreSeek** cannot be performed on pregnancies in which there has been a fetal demise, vanishing twin, or reduction.

<sup>3</sup> **PreSeek** is a screening test and pregnancy decisions should not be based solely on the results of **PreSeek**. The purpose of **PreSeek** is to indicate if the fetus is at an increased risk for a genetic disorder allowing for follow-up invasive prenatal studies or neonatal studies.
